

**The Leader in Unified Access & Intrusion**

Since 1979, Monitor Dynamics has been the leading manufacturer of unified security systems management (software and hardware) solutions for government and commercial organizations across the globe. Monitor Dynamics delivers unified access control, intrusion detection, video management and FIPS-201 approved identity management solutions that provide the highest levels of security, risk reduction and critical asset protection available. The SAFEnet open architecture platform empowers organizations to manage their security systems, video surveillance and facility operation equipment from a single, centralized command and control management console. Monitor Dynamics currently maintains several thousand unified security installations for blue-chip organizations worldwide - supporting various industry segments.

**A cross section of customers include:**

- US Department of Justice
- Los Angeles Air Force Base
- US Bureau of Engraving and Printing (BEP)
- San Diego Unified School District
- National Reconnaissance Organization (NRO)
- Transportation Security Administration (TSA)
- Federal Bureau of Investigations (FBI)
- Smithsonian Institution
- Massachusetts Institute of Technology (MIT)
- NASA Jet Propulsion Labs
- United States Marines (Nationwide)
- United States Army (Nationwide)
- San Francisco Airport
- Arizona Supreme Court
- State of Arizona Administrative Offices
- Bank of America (Globally)
- US Navy Europe (Globally)
- Atlantis Casino and Resort (Bahamas)
- California Department of Transportation
- Department of Veterans Affairs
- PepsiCo
- Smith and Wesson
- American Express
- United State Army Reserve Command (USARC)
- Cox Communications
- Daimler Chrysler Trucks (North America)
- US Food and Drug Administration (FDA)
- Department of Agriculture
- Ronald Reagan Building and International Trade Center (Washington, DC)
- Hanscom Air Force Base
- Raytheon
- General Dynamics
- Bank of China
- Sigma Aldrich Chemical Company (Global)

**Unified Security Platform**

The SAFEnet platform delivers a centralized unified security management solution for installations of all sizes. Individual applications can be unified into the platform as optional standalone modules or can be deployed as a customized unified end-to-end security solution. The SAFEnet platform seamlessly unifies all of the critical components necessary to manage and monitor multi-site facilities including access control, intrusion detection, identity management and video surveillance. The platform is built using a robust open architecture model that meets the performance demands of mission critical infrastructure applications running across multiple systems and locations.

**Advanced Security Systems Engineering**

All products manufactured by Monitor Dynamics are designed by engineers with years of security domain knowledge. Monitor Dynamics' ALERT (Advanced Logic Engineering and Research) team understands the functional requirements of today's security system, alarm management, access control, video surveillance and identity management specifications for both corporate and government system users.

**Monitor Dynamics Products**

**Unified Security Management Software:**

- SAFEnet - Unified Security Management Software for access control, intrusion detection, video surveillance and identity management

**Intelligent Access Control Hardware:**

- BlueEdge - Intelligent Control Equipment (ICE)
  - BlueEdge Unified Digital Controller (UDC)

**Intelligent Digital Controller Hardware (IDC)**

- Network Local Controller (NLC II)
- Dual Door Controller (DDC)
- Alarm Zone Controller (AZC)
- Output Relay Controller (ORC)
- Arming Control Unit (ACU 7)
- Enclosures

**Specialty Products:**

- iTRUST Access Control System
- Trusted FICAM Platform
- STAT Identity Station

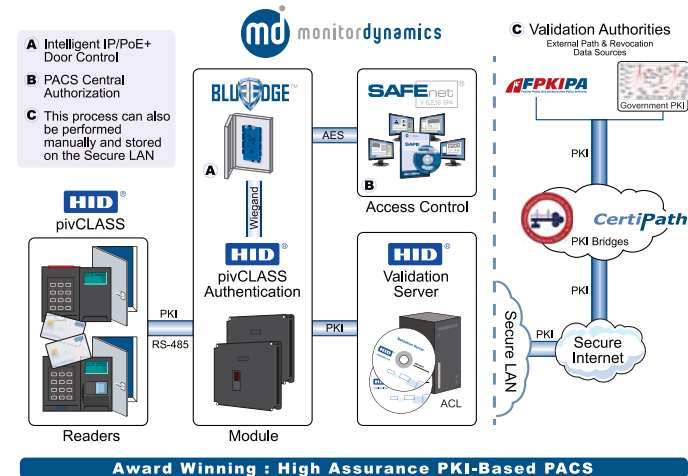

## End-to-End Unified Solutions

Monitor Dynamics focuses on delivering unified access and intrusion solutions that exceed our customers' security requirements from project inception through final completion. The Monitor Dynamics comprehensive solution includes: software, hardware, training, technical support, maintenance, system upgrades and direct on-site engineering support. The Monitor Dynamics Certified Dealer Network is skilled at designing, installing and maintaining SAFEnet systems to provide maximum value and immediate time-to-benefit.

### Federated Identity Credential & Access Management (FICAM) Platform

The Trusted FICAM Platform satisfies all PACS system compliance requirements with Homeland Security Presidential Directive 12 (HSPD-12) and Federal Information Processing Standards Publication 201 (FIPS-201) mandates. FICAM is the government PACS of choice for compliance with FIPS-201 and OMB 11-11, utilizing PIV, PIV-I, PIV-C, TWIC, CAC and more.

### Company Highlights & Milestones

- Over 30 years of successful high-security systems experience
- Currently support over 10 million access points across the globe for thousands of installations
- Software & hardware product solutions are time-proven in many of the worlds largest and most highly-classified government systems
- UL1076 and 294 certified
- The most decorated product in the industry (recipient of numerous National Product Innovation Awards)
- First PACS to read PIV-I in a DOD operating environment
- First PACS to pass CertiPath Trusted PACS certification testing

### Training & Certification

Monitor Dynamics offers hands-on instruction for their security products. Monitor Dynamics' technical training and certification programs provide extensive instruction on the configuration of each component and the proper procedures for effective and efficient site installations. Security personnel who attend Monitor Dynamics' training courses become proficient in operating and administrating Monitor Dynamics enterprise security systems.

### Technical Support

Monitor Dynamics' expert Trusted Support team offers multiple levels of tiered support services geared at providing cost effective services that address each unique customer need. The Trusted Support team is equipped with the latest customer support management technology ensuring all e-mails and calls are directed and processed as promptly and professionally as possible.

### Quality Customer Service

Monitor Dynamics is dedicated to providing the highest level of response and support for customer orders, repairs, inventory availability and advance replacement services. With Monitor Dynamics, all of your security products are ordered, processed and shipped from one central location.

### Purchasing Information

Monitor Dynamics offers a wide variety of purchasing options for government, institutional and commercial organizations across the globe. For immediate information on the best option to fit your specific purchasing needs, please contact our Account Management Team at: [info@mondyn.com](mailto:info@mondyn.com) or call (210) 477-5400.
