

Partnership - Monitor Dynamics and Mountain Secure Systems (MSS)

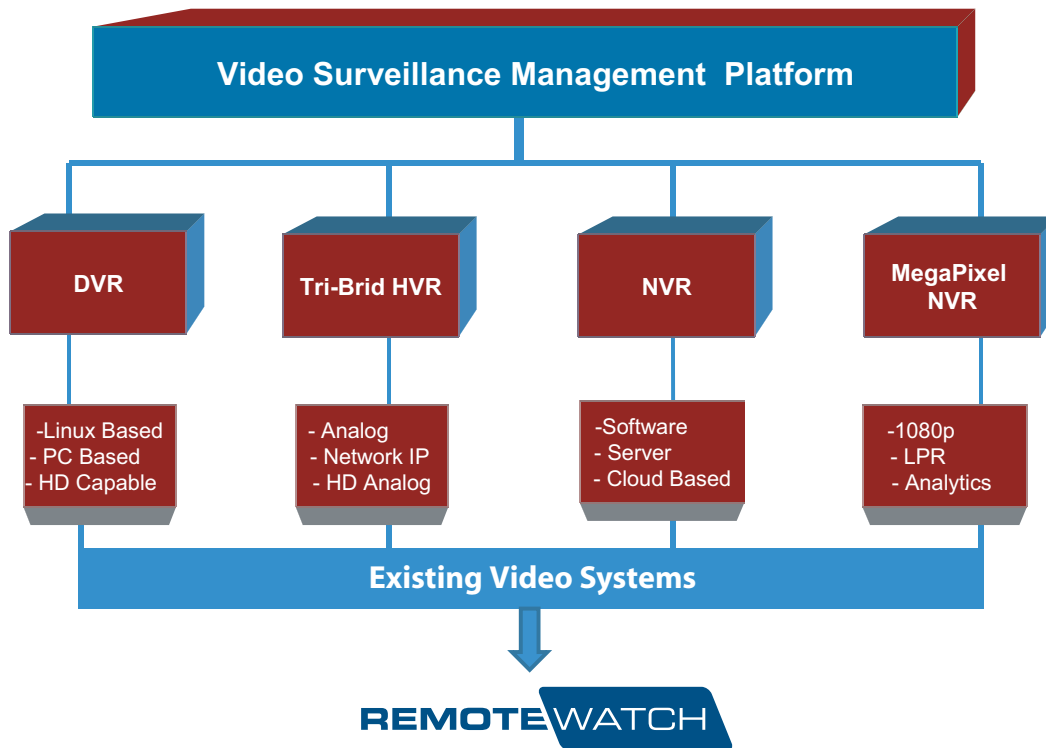

Delivers - City-wide, County-wide and District-wide Video Surveillance Management

Value - 3 Affordable, Pre-configured Packages.
Instant Force Multiplier for Law Enforcement Agencies.

RemoteWatch – Powered by MSS Summit Technology, delivers unified point-to-point, point-to-multipoint and wireless mesh networks. In a city-wide system configuration, video from each camera is streamed to police headquarters where it is viewed in real-time, recorded for playback and stored for a minimum of 30 days.

Operations and dispatch centers are equipped with monitors where officers can control each camera, adjust their cameras visualization points, pull up archived video on demand and capture video segments to be presented as evidence when needed.

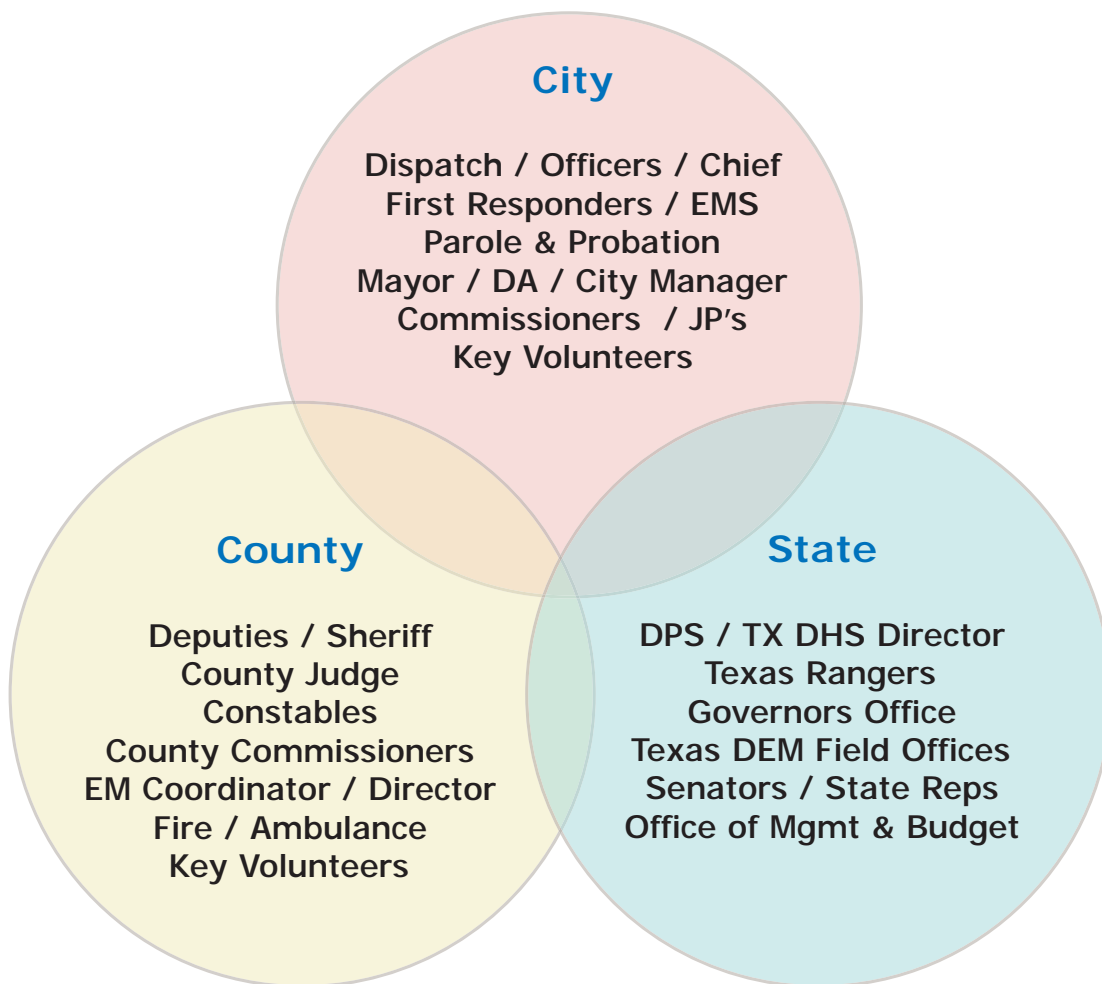

Each WITNESS Wireless Camera System comes custom-configured based on a camera placement survey that will be performed at the customer location.

Advantages of The WITNESS Wireless Crime Camera System:

- Total Cost Savings vs. Wired Analog Systems
- Force Multiplier & Video Verification for Law Enforcement Agencies
- Ability to use High-Resolution Megapixel Camera Technology
- Consistent Image Quality, Regardless of Distance
- Ability to use Power over Ethernet and Wireless Functionality
- Full Remote Camera Functionality – PTZ, VOIP Audio and Digital Inputs and Outputs over IP, in Conjunction with Video
- Camera Settings and System Adjustments over Wireless Connection
- Modular Flexibility and Scalability – add and remove items as needed
- Video Analytics and Intelligence Capabilities Software Integration = Gunshot Detection, Behavioral Analysis, Object Recognition, License Plate Recognition
- Software Integration = Biometrics and Facial Recognition
- Systems Interoperability

Unified Video Interoperability

Wireless Crime Camera System

Modular System Packages

Package 1:

- 32 IP Cameras (or less)
- 1 VIEWpoint HVR with Video Wall Module & Video Management Software
- 2 Flat Screen Monitors up to 40"
- All necessary network routers and POE switches
- All necessary indoor and outdoor mounts
- All necessary back-end cabling, wiring, connectors and power supplies
- Up to 8 MSS Summit Radio Clients
- 1 MSS Base Station
